MUNICH | BAHNHOFPLATZ 7

Public webcam photo archive

31 August 2026 – 12 October 2026

820	43	61,920
recovered photographs	calendar dates included	minute addresses in scope

What this document contains. Every timestamped photograph recovered from the tested public image addresses for these dates, in chronological order. Each photograph is shown as a crop of the advertising hoarding. The time caption links to the full source JPEG.

How the images were found. The DB second trunk line project website embeds the panTerra viewer for **stamm / camera 01** (view from Arnulfstraße). Its public image paths contain the year, month, day, hour and minute. Every minute from 00:00 to 23:59 was tested on each included date. The large JPEG (**_b**) was preferred; the small JPEG (**_s**) was checked when the large version was absent. Two sizes of the same timestamp count as one photograph. Original downloaded files are preserved unchanged in separate source archives.

Reading the times and the gaps. Dates and times reproduce the public archive paths. The provider’s capture timezone has not been independently confirmed; no timezone conversion has been applied. A missing public JPEG does not establish that the camera took no photograph. This collection does not certify the completeness of panTerra’s internal archive. Individual snapshots, lighting, obstructions and image resolution limit what can be established between views.

Image handling. The hoarding crop follows the supplied reference album: x=0–410, y=745–1275 on a 2400×1600 image, scaled proportionally for other source sizes. Only cropping and viewing compression have been applied; there is no content retouching or enhancement. The complete original view is available through each source link.

Public starting points: DB project webcam page · panTerra viewer: stamm / 01
Retrieval / public-path checks: 13 November 2026. See the accompanying source and coverage files for individual request times.

Daily counts are on the next page. Click an index date or use the PDF bookmarks to jump to that day.

Daily recovery index

First and last refer to recovered public images, not operating hours of the camera.
